“ A revolutionary control system
featuring **thermocouple flame
sense** technology

ecoflow
Control System

SKYTECH

One valve, multiple options from **ON/OFF, thermostatic control or even real flame option..**

Remote control:
On/Off, Hi/Med/Low

Remote control:
touch control

Wall switch or
remote control
option

Upgradable Sys-
tem - Fan, Light &
Auxiliary Control

Reliable in harsh
environment

Horizontal
components
layout (50 mm max.)

Intermittent
or Continuous
pilot option

Very quick
gas change

Optional battery
powered
or battery back up

Reliable
operation in
humid, windy and
contaminated
conditions

Copreci and Skytech have combined their strengths and jointly developed the **ecoflow control system** designed specifically for the hearth market.

This unique system is powered by Skytech and fueled by Copreci to achieve the ultimate in features, safety and user-friendly operation. Featuring our quick-response **Thermocouple Flame Sense system**

VALVE SPECIFICATIONS

- 80,000 BTU Total (variable flow, 3 position step motor)
- 20,000 BTU (2nd outlet fixed)
- Temperature Rating: 32F-176F
- Single inlet with Dual Outlets: 3/8" x 18npt
- Pilot outlet: 3/8" x 24unf
- Multipoise
- Pressure Test Ports
- Die Cast Aluminum Body
- Wire Harnesses: 15.7" & 31.5"
