

COPRECI

setting standards for gas components

Why Copreci?

47 years ago a group of 40 people came together with a sole project: "Manufacture of gas components"

Today, Copreci is the **biggest manufacturer** in the world of gas components, and we have become a group of **2.000 people** with production **facilities in 7 countries.**

In all this time we have questioned absolutely everything, except the essential thing which is our reason for being: "Manufacture of gas components"

What about safety?

Safety is a feeling, a sensation, an intangible value. It can also be understood as a basic need, something to aim for and the ultimate objective for a human being.

For us, safety means having the broadest safety components catalogue on the market, having the **greatest production capacity** in the world and the confidence of a company that has made more than **one billion gas components.** It also means being close by to provide clear and professional answers, together with credibility and our guarantee of constantly innovating, improving and creating better and safer products.

Why are Copreci's valves safer than others?

- 1... Because Copreci offers **double safety** feature valves.
- 2... We have led safety in the gas cooking market for years.
- 3... We are the largest manufacturer of safety components in the world.

a complete range for free-standing cookers, built-in hobs and ovens.

Built-in hobs

Safety gas valves

Series	CAL 22100	CAL 24110	CAL 22200	CAL 25210
Material	brass/aluminium	brass/aluminium	brass/aluminium	Aluminium
Burners	standard/triple	dual	standard/triple	dual/triple
Power (Kw) -LPG	10	12	8	12
-NG	5	6	4	6

Gas valves

Series	CAM 17501
Material	brass/aluminium
Burners	standard/triple
Power (Kw) -LPG	13
-NG	6,5

Electronic systems for gas control

Series	SU-K	EGME	T-KEY
Components	electronic board + driver + touch control + motorized valve	electronic board + valve + switch harnesses	electronic board + standard valve
Nbr. of burners	2, 3, 4, 5, 6	2, 3, 4, 5, 6	2, 3, 4, 5, 6
Emergency stop	☑	☑	☑
Automatic re-ignition	☑	☑	optional
Timer function	☑	optional	optional
Childlock	☑	☑	☑
Touch control	☑	-	-
LED indicators	☑	☑	optional
Instantaneity	☑	☑	☑
Accurate electr. flow	☑	-	-
6h. lock	☑	☑	☑

Free standing cookers

Safety gas valves

Series	CAL 20703	CAL 20706	CAL 5200	CAL 20707
Material	brass/aluminium	brass	brass/aluminium	aluminium
Burners	standard/triple	dual	standard/triple	standard/triple
Power (Kw) -LPG	10	12	13	8
